Abstract

Long thought to exist only in science fiction, I present the schematics for a translation device. This device creates a graph of matched words in both languages, finds patterns of similarity, and finds fixed points across both languages. The outputted translation is calculated efficiently, automatically, and is grammatically perfect.

Match each word on the left to the corresponding word on the right. Some words on the right are not used, and some may be used more than once.

1. _____ for	A.	allumé
2. _____ bed	B.	bavarder
3. _____ mother	C.	campagnol
4. _____ his	D.	caser
5. _____ could	E.	clan
6. _____ has	F.	commandant
7. _____ one	G.	coterie
8. _____ street	H.	douleur
9. _____ raise	I.	fils
10. _____ plaza	J.	fort
11. _____ happy	K.	genre
12. _____ click	L.	manette
13. _____ seven	M.	marcheur
14. _____ at	N.	matière
15. _____ gullible	O.	mettre
