

# Meet the MathCamp Secret Police!

## Bad Horse

Everyone who is in their second year as MCSP always lies, and there is at least one such person.

- Mathematical interests: Field theory, Integration theory
- Hobbies: Riding across the nation, Sinning
- Fun Fact: I rule the Evil League of Evil with an iron hoof.

## Bowlof Petunias

Less than five of the MCSP have been MCSP for a number of years dividing the number of years that I have been MCSP.

- Mathematical interests: Teichmuller theory, Number theory, Algebra
- Hobbies: Metaphysical discussions, Eviscerating misbehaving campers
- Fun Fact: I have been to seventy different countries which have Japanese as an official language.

## **Jarof Petunias**

I have been MCSP for five years, which is longer than anyone else.

- Mathematical interests: Information theory
- Hobbies: Flying, Hopping on one foot, Oppressing the masses
- Fun Fact: Bowlof, who is my sister, is a liar.

## **Jeff Hicks**

I have been MCSP for a prime number of years. No three of us have all been MCSP for the same number of years.

- Mathematical interests: Numerical analysis, Experimental methods in quantum field theory, Set theory
- Hobbies: Torturing small woodland creatures
- Fun Fact: By a remarkable coincidence, I have the same name as a JC.

## **Pancake Pansey**

Undead-Henry would say he has been MCSP for the same number of years as me.

- Mathematical interests: Logic, Analysis, Several complex variables, Time travel
- Hobbies: Needlework, Altering history
- Fun Fact: I have never told a lie in my life!

## Undead-Henry Clay

If Bowlof has not been MCSP for the same number of years as Bad Horse, she has been MCSP for the same number of years as Jeff.

- Mathematical interests: Mathematical physics, Ergodic theory
- Hobbies: Intimidating people shorter than me, Filling in bubbles, Losing zombie presidential elections
- Fun Fact: I have not been MCSP for the same number of years as Pancake.

## Zan Dahorrible

Jeff has been MCSP for at least as long as me.

- Mathematical interests: Inequalities
- Hobbies: Answering phones, Reading capitalized first letters of things in lists that might help me solve puzzles
- Fun Fact: My name contains a secret code that expresses  $\sqrt{2}$  as a fraction of two integers.
