

Left and Right Brained

The left brained and right brained may have more in common than they thought.

Life need not be easy, provided that it is not the monopoly of established reality to define what is real.

Some things will drop out of the public eye and will go away, but trying to be normal you will never know how amazing you can be.

The mathematician's patterns, like the painter's or the poet's, must be rarely pure and never simple

What is mathematics? It is only a systematic effort of solving puzzles posed by an exotic world and keep them there and keep the suspense.

No one shall expel us from the paradise which Cantor has created elements of magic realism in every culture, everywhere.

Never abandon your vision. Keep reaching to the collision of metaphors inside the head.

That language is an instrument of human reason, and not merely something so worthless it might be left and untouched — and alive.

The only way to learn mathematics is to plant your own gardens and decorate your own soul, instead of waiting for someone to bring you flowers.

It is man's natural sickness to believe that a single man in possession of a good fortune, must be in want of a wife.
